

SOCAH HYDRAULIQUE group expands and announce the acquisition of EDH company.

Since 1992, EDH did not stop to growth up and develop new activities: Connectic and tube bending (EDH Connectic), fluid conditioning (EDH Fluid), created IDSystem Company and opened to the international sector with Exago-Group.
The workforce increased from 2 to 65 today.

You also have contributed to this success thanks to the orders that you have kindly entrusted to us and I thank you for it.

We are going to celebrate, end of September, EDH 25th anniversary and for me a well deserved retirement will began.

For my colleagues, I wanted to found a buyer who shared the same human values than me.

So I leave dynamic and healthy companies to Mr Benoit CABANIS CEO of SOCAH Hydraulique who will lastingly keep developing and sustaining them.

Gérard DAILLET
CEO SOLLERTIA-Group

The SOCAH HYDRAULIQUE GROUP pursues its development strategy with EDH and IDSystem take over.

The purchase of those companies will therefore allow us to complete our range and have new know-how.

Benoit CABANIS
CEO Groupe SOCAH Hydraulique

About SOCAH HYDRAULIQUE GROUP

Created in 1993, SOCAH HYDRAULIQUE is the partner of manufacturers and resellers for material equipped with hydraulic components. The company offers a wide range of hydraulic components, thanks to its direct relations with factories based in Europe.

Became a cylinder manufacturer in 2004 with the acquisition of Luce Hydro, the Group also developed itself by integrating a connectic supply activity in 2009, then in 2013 by integrating AHR Company, specialized in pneumatic components. SOCAH HYDRAULIQUE GROUP is recognized in its market for its advice, service, stock, logistic and reactivity.

In addition to trading, SOCAH HYDRAULIQUE GROUP deploys 3 activities of manufacturing:

- At its VINAY-38 (LUCE HYPRO) factory and also the one at JANZE-35 (HELBERT), the GROUP manufacture standard and made to measure cylinders.
- At its CHATEAUBOURG-35 (SOCAH) workshop, design and manufacture of hydraulic power units and pneumatic cylinders.
- At its RENNES, REDON, VITRE offices, manufacture of hydraulic hoses on demand.

About EDH and IDSystem

Located to Mésanger-44 near Ancenis, EDH is specialized in standard and tailor made hydraulic tanks for 25 years.

EDH Connectic manufacture bending tubes in steel, stainless steel and coated steel. EDH Fluid is specialized in decontamination and fluid conditioning.

At its Ancenis-44 plant, IDSystem is a hydraulic power units manufacturer and a hydraulic systems and testing benches designer.

ID System-didactic entity is the schools and training centers' partner for the manufacture of equipments designed to industrial and mobile hydraulic training.
